By the Numbers

420—Veterans have applied to become FortiVeterans

204—Veterans have been accepted

52—Veterans currently enrolled

105—Veterans have been hired

106—Fortinet Partners regularly scout our FortiVeterans

"If you're a transitioning USMC 06XX, Army Signalier, USN IT, USAF Combat Comm. I highly recommend Fortinet's Veterans program. This program was a career "GAME CHANGER" for me. Stephan Tallent, CISSP Jay Garcia and Andrew Adrian provided me with the additional skills I needed to make the move from DOD to private sector information security. You'll gain invaluable insight into the field, training and spot on career advice. Really gave me a solid idea of the best entry point for me into the information security field".

Windle Riles, E9-MgySgt USMC, FortiVeteran

Overview

The Fortinet Veteran Program helps military service members (past and transitioning) find opportunities at Fortinet and our Partners.

After a Veteran applies online and before acceptance, they must go through two interviews. While all Veterans that apply are given an initial interview only those who meet desired guidelines are offered a second interview. All interviews are conducted in-person or Skype.

Once accepted, FortiVeterans are provided six months of professional networking, Network Security Expert Online certification access, and mentoring. All training is virtual, there are no in-person requirements.

A unique trait of the Fortinet Veteran Program, it has been developed and managed by Veterans for Veterans, creating a sincere and relatable experience.

There is no fee for Fortinet Partners to view/hire current FortiVeterans and there is no fee for Veterans to join. The Fortinet Veteran Program creates a win-win situation for all parties involved.

Employment

The Fortinet Veteran Program Team Lead creates a **BattleCard**, designed for the employer, that showcases the Veteran's experience, qualifications, clearances, location, availability and categorization for specific cyber security positions.

This saves Fortinet and Partners from wasting valuable time interviewing Veterans that do not meet available position requirements.

Recruitment

The Fortinet Veteran Program Team works with a vast network of military employment professionals, institutions of higher education, and successful Veterans.

Candidates are found at career fairs, training courses, military installations, and through word of mouth.

For interested Veterans, please email: veterans@fortinet.com for more information and application details.
